march 2013

### Creation of Overflown, an poetic interactive installation

We won the prize of the "Best Graphics" at the Virtual Fantasy contest of the Laval Virtual exhibition in April 2013.

We has also been selected to present the project at the IVRC contest in Tokyo, in October 2014.

To learn more, please look at my portfolio

<http://corentinfatus.com/project/overflown>

october 2013 - january 2013

### Creation of Rooms, a web application for students to easily find free rooms in the school

Rooms is a web application which allows the students of L'Ecole de design Nantes Atlantique (the Design School of Nantes) to easily find a free room to work outside their classtime.

I fully programmed this web application with Javascript and PHP. It is still work-in-progress, but is almost operational, and the first version shall be released in the next months.

october 2013 - january 2013

### Creation of a mobile game for Android, named Gravity Drop, in ActionScript.

Given the success of the game amongst my fellow students, we then adapted it for touch table.

Feel free to visit my portfolio to learn more :
